

Abstract

A display rack including a pair of substantially horizontally oriented members in substantially parallel spaced relation, a stop member associated with said first ends of said pair of substantially horizontally oriented members, a securing portion affixed to said second ends of said pair of substantially horizontally oriented members, and a carriage. The substantially horizontally oriented members each have first and second ends, the second ends of which are turned upwardly. The securing portion has at least one peg hook extending upwardly and rearwardly therefrom. The carriage includes a middle portion extending between and above the pair of substantially horizontally oriented members and a pair of engagement members that slidingly engage the pair of substantially horizontally oriented members.
